DESCRIPTIVE LIST OF
GLADIOLUS
22nd Season

CONNECTICUT YANKEE

ARTHUR A. ARENIUS

59 BLISS ROAD, LONGMEADOW 6
SPRINGFIELD, MASSACHUSETTS

FOREWORD

Again let me say, "Thanks a Lot" for your valued and continued patronage and your many fine letters (most of them unanswered I regret to say). Last season was a rather trying one with a three-months drought, hurricanes, labor shortages, etc., but in spite of all this, you have made it the best season ever. I have harvested a very fine crop of bulbs although the quantity is smaller than last year.

While the "Old Man" is trying to keep up the morale of the Home Front with his Glads, the boys from last accounts are all well and doing their bit for Uncle Sam. "Ed," a Radio Operator in the Merchant Marine, Sgt. "Art" is in Italy, and Marine "Al" is in the Pacific. Kinda miss em! Even "Mother" claims its hardly worthwhile cooking for just two!

As you will notice, retail prices for the most part are the same as last year. Most wholesale prices are higher. The natural causes of last season still hold. There is an abnormal demand for both bulbs and flowers, not to mention the increased cost of labor and all items of expenses in growing glads. There is a scarcity of bulbs, especially the better commercial varieties. I know many items will be sold out, so early ordering is advised. There just simply isn't enough bulbs of some varieties to go around.

BUY BONDS FOR FREEDOM BUY GLADS FOR BEAUTY

GUARANTEE

I guarantee satisfaction. If for any reason you are not satisfied, please write me and I will do my utmost to make satisfactory adjustment. Likewise, if you are pleased, I will be glad to hear of it.

ORDER EARLY

We both benefit when you order early. Early orders get the choicest bulbs with less chance of being out of any variety. Also, I have more time to put up your order, less chance of error and less overtime. Please order early!

With every order I include cultural directions.

Visitors are always welcome at my fields during the blooming season.

PLEASE READ BEFORE ORDERING

Cash with order, or 25% deposit if future delivery is desired, balance C.O.D. Delivery charges prepaid on orders of \$1.00 or more, except as elsewhere stated. If less, add 15¢ toward shipping cost. No order taken for planting sizes (No. 5 and No. 6) after Apr. 15th, and for large bulbs after May 15th. Can furnish mixtures until June 15th. **No single item less than 10¢.** I ship anytime. Yes! I give overcount. Please do not hold me to any obvious errors that may appear in this price list.

If your order contains bulbs from the General List (which are Prepaid) and the Quantity List (which are not Prepaid) I will send the bulbs express collect and put in enough extras to more than offset the express charges.

Money orders should be made out to: Springfield, Mass., Postoffice

NEW GLADS FOR 1945

For several years now I have watched the seedlings of Jim La Salle (originator of Lavender Prince and Red Rival) and have again prevailed upon him to allow me to introduce three of his seedlings. They are all pinks, distinctive and different and very outstanding. They are all proven commercials and extra cut flower varieties. I also believe they will become Prize Winners at the Shows. Fair stocks are available, consequently the introductory price is low for such quality glads. Take a tip from me, try a few for trial and I am sure you will get more the following year! Don't let the comparatively low introductory price fool you! And Commercial Growers! Take a tip from me, invest in these three!

CAPSICUM. Deep pink Decorative with a striking speckling or peppering on a cream throat blotch. Very pretty clear color. Average height of about 4 feet, and 4½ inches in blooms, 6 open on an 18-bud spike. Good propagator and germinator. Healthy bulbs. Midseason.

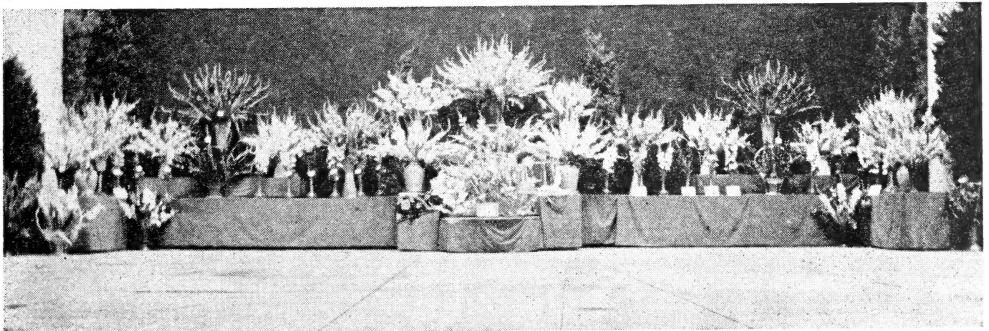

COVER GIRL. At the 1944 N. E. G. Show at Boston, this seedling was awarded by the Massachusetts Horticultural Society its First Class Certificate. (Their highest award). Medium pink, 5½-inch blooms, 10-12 open on a 30-inch flowerhead with formal placement. Grows tall, 5-5½ feet with heavy, large foliage. Good grower and propagator. Believe this will give Picardy competition. Midseason.

PIONEER. Mr. La Salle considers this his finest seedling. Deep salmon pink, blending to a cream throat. Grows easily 5½ feet tall, 6-inch blooms, formal placement with 6-8 open on a 18-bud spike. Always straight. Plant very large with wide, heavy foliage. Most large glads are inclined to be coarse, but this variety has refinement and a very beautiful, clean color. Makes large bulblets which germinate readily and grow to more than average size. Midseason.

PRICES FOR EACH VARIETY:

1	Any Size	\$ 2.00
6	Any Size	\$10.00
12	Any Size	\$20.00

No Bulblets This Year.

(One of my many exhibits at Boston)

The 1944 Releases

CONNECTICUT YANKEE. The reports reaching me on Yankee are most flattering and as it becomes better distributed will be in great demand. Here are samples of some of the reports received:

"Great Glad and beautiful."—Wisc.

"Of all of the glads I grew last summer, Connecticut Yankee and P39 were the two best."—Ill.

"Think Connecticut Yankee one of the finest things I have seen. That sparkling color is simply beautiful and placement absolutely 100%."—N. Y.

CONNECTICUT YANKEE

Color, blush pink or light pink. Clean solid color with a most attractive red throat blotch. Double row of florets with 20-22 buds, 8 open, 4 showing color. Florets plain petaled and wide open. Flowerhead 24-28 inches. Height in field without special culture about 55 inches. Bulblet production and germination fair. Strong grower with heavy, wide, dark green, foliage and produces healthy bulbs. Blooms in 80-85 days. Sorry but the advance demand has been so heavy that I am all sold out of small and bulblets. Have only large bulbs left.

Large Bulbs Only

1 —	\$ 5.00
6 —	25.00
12 —	50.00

RED RIVAL

Color, very bright glowing red of exceptional brilliance, clean solid self. 6 very large blooms with 6 showing color on a 18-20 bud spike. Height in field without special culture about 55 inches. Medium bulblet producer. Strong grower and produces clean, healthy bulbs. Blooms in about 85 days.

LAVENDER PRINCE

This is a King Arthur seedling with other parent unknown. It is about two shades lighter than King Arthur, perhaps a shade between Minuet and King Arthur. Practically a self-color. Very beautiful and quite an improvement on King Arthur. 6 medium sized blooms (4½"-4¾") on a 18-20 bud spike. The florets are wide open, arranged in good placement on a tall, wiry spike of about 55". Bulblet production and germination good. Produces solid, healthy bulbs. I feel confident this variety will take its place right in the front row among the lavenders.

	Large Per 1 1/4" Up		Medium 3/4"-1 1/4"	Small 3/8"-3/4"	Bulblets Per	
BEACON (Palmer) Showy salmon scarlet with large cream throat. Tall straight spike. Very popular and extra commercial.	1 10	.10 .75	2-.10 .50	4-.10 .30	100 —	.25 —
BEAUTY CLYNIC (Wilson) Ruffled light salmon pink. Beautiful pastel shade.	1	1.00	.75	.50	10	1.00
BEAUTIFUL DREAM (Kingsley) Tall beautiful pink. Fine commercial.	1 10	.10 .75	2-.10 .50	—	100 —	.25 —
BIG TOP (Rich) Very large light pink with small carmine feather. Opens 7 on a 20 bud spike.	1 10	.35 2.80	.25 2.00	.15 1.20	10 100	.30 2.00
BINGO (Canine) Large pink, flecked and tinted pink. Rather a muddy color to me, but wins at the shows because it opens many large blooms.	1 10	.10 1.00	2-.15 .75	—	100 —	.25 —
BIT O'HEAVEN (Crow) Old time deep orange and yellow. Opens many medium blooms on a tall spike.	1 10	.10 .75	2-.10 .50	—	100 —	.25 —
BLACK OPAL (Errey) Tall dark red with 8 large blooms open on a rather weak spike.	1 10	.10 1.00	2-.15 .75	2-.10 .50	100 —	.30 —
BLUE ADMIRAL (Christ) Dark blue with 5 open blooms on a straight spike.	1 10	.10 1.00	2-.15 .75	—	100 —	.35 —
BLUE BEAUTY (Pfitzer) Tall medium blue with 6-5" blooms open. Considered best blue.	1 10	.10 1.00	2-.15 .75	2-.10 .50	100 —	.30 —
BOLERO (Leffingwell) Ruffled, needlepoint type light smoky orange with a red blotch. Not a pleasing color to me but unusual.	1	.50	.35	.20	10	.50
BRIDE'S DELIGHT (Wilson) Large cameo pink with light yellow throat. Very beautiful.	1 10	.25 2.00	.15 1.20	.10 .80	10 100	.20 1.25
CORONA (Palmer) Creamy white with rose edge on all petals. 6 large wide open blooms on tall spike. Strikingly different and becoming very popular. Prize winner many times.	1 10	.15 1.20	.10 .80	2-.10 .50	100 —	.35 —
CRINKLE CREAM (Ellis) Ruffled light yellow. Opens 4-5 large blooms on tall spike. Quite outstanding.	1 —	1.00 —	.75 —	.50 —	10 100	1.00 8.00
DEL RAY (Burtner) Light red with cream throat. Good, commercial type.	1 10	.10 1.00	2-.15 .75	2-.10 .50	100 —	.30 —
DR. BENNETT (Diener) The standard commercial scarlet. Tall, fine keeper.	1 10	.10 .75	2-.10 .50	4-.10 .30	100 —	.20 —
DR. WHITELY (Riley) Clear apricot-yellow. Opens 6 large blooms on a tall straight spike. Very good.	1	.60	.40	.25	10	.35
EDITH GRACE (Harder) White with red throat blotch. Opens 6-8—4 1/2" blooms on a long flowerhead. Good cut flower variety.	1 10	.20 1.60	.15 1.20	.10 .80	10 100	.20 1.50
EGLANTINE (Scheer) Ruffled, giant, clear light pink shading to a cream throat. Wonderful when well grown but has a tendency to be unreliable and the bulblets are not good germinators.	1	10.00	7.50	5.00	10	5.00
ELLEN MARIE (Pruitt) Large and early salmon pink. Medium height, rather weak stem.	1 10	.10 .75	2-.10 .50	4-.10 .30	100 —	.25 —
ETHEL CAVE-COLE (Cave) Light pink, usually flaked. Long fine spike of exhibition bloom.	1 10	.15 1.20	.10 .80	2-.10 .50	10 100	.10 .75
FIREBRAND (Ellis) Fine red with a deeper throat.	1	1.00	.75	.50	10	1.00
FIREFLY (Palmer) Bright scarlet with cream line on lip. Early cut flower but does not grow too tall.	1 10	.10 1.00	2-.15 .75	2-.10 .50	100 —	.35 —
FLORA FARMER (Quackenbush) Pure deep pink with cream throat. About 8 medium blooms open with many showing color.	1 10	.10 1.00	2-.15 .75	2-.10 .50	100 —	.30 —
FLYING FORTRESS (Wilson) Light gray smoky, opening up to 10-12 large blooms on tall spike. A wonder smoky show flower.	1	2.50	1.60	1.20	10	1.25
FRANCIS M. IRWIN (Wilaon) Rosy lavender with deeper blotch in throat. 8-5" florets open on a 20 bud spike. Fine commercial.	1 10	.50 4.00	.35 2.80	.25 2.00	10 100	.35 2.00
GARDENIA (Scheer) Creamy white, 5-6 medium sized florets on a tall spike. Good cut flower.	1 10	.10 .75	2-.10 .50	4-.10 .30	100 —	.20 —
GENGHIS KHAN (Scheer) Light pink with cream throat. 5-6—6" blooms on 4' spike. Outstanding.	1	3.00	2.00	1.00	10	2.00

	Large Per 1 1/4" Up	Medium 3/4"-1 1/4"	Small 3/8"-3/4"	Bulblets Per	
GOLD DUST (Pfizer) Probably the deepest low priced yellow cut flower variety. Very early, medium sized blooms on tall spike. Very satisfactory cut flower.....	1 10	.10 .75	2-.10 .50	4-.10 .30	100 — .20 —
GOLDEN CHIMES (Ellis) Large, tall, ruffled, pale yellow. Midseason. Very good.....	1 10	.10 .75	2-.10 .50	4-.10 .30	100 — .20 —

Unlabeled Collections of Assorted Glads

Many folks desire to plant glads in the garden for cut flowers, but do not care to fuss with the labeling of the different kinds. To satisfy this need I make up special collections of named varieties but unlabeled. In making up an assortment of 100 glads, I usually put in 50 varieties of 2 bulbs each, thus making sure of good color balance. However, if you prefer or dislike certain colors, just mention it and I will act accordingly. These same varieties if bought under name would cost several times the purchase price.

Rainbow Collection

Large Bulbs 1 $\frac{1}{4}$ " and up	Medium Bulbs $\frac{3}{4}$ " to 1 $\frac{1}{4}$ "
25 — \$1.50	25 — \$1.00
50 — \$3.00	50 — \$1.75
100 — \$5.00	100 — \$2.75
200 — \$9.00	200 — \$5.00

De Luxe Collection

Large Bulbs 1 $\frac{1}{4}$ " and up	Medium Bulbs 1 $\frac{3}{4}$ " to 1 $\frac{1}{4}$ "
25 — \$2.50	25 — \$1.25
50 — \$5.00	50 — \$2.50
100 — 10.00	100 — \$5.00
200 — 18.00	200 — \$9.00

CARE AND CULTURE

SOIL AND FERTILIZER

Glads do well on most any soil if they are planted in the open garden where there is plenty of sunshine. You may work well rotted manure into the soil in the Spring by putting into the bottom of your planting trench, then covering with an inch of soil, then planting your bulbs. Vigoro is also good. Two or three applications of commercial fertilizer may be made on the surface along the rows during the growing season before the plants bloom. Any fertilizer should be kept from direct contact with the bulb or foliage. If you wish to grow immense spikes you must fertilize heavily; your plants must also have at least an inch of water every three or four days.

PLANTING

Work soil to a depth of eight inches, or ten inches will be better. For large bulbs they should be covered with not less than six inches of soil. The deeper planting helps keep them upright when blooming. Smaller bulbs should be planted not less than two inches. You may regulate your distance apart in the row by the space you have. Plant rows anywhere from 2 ft. to 3 ft. apart. Plant in rows from two to six inches apart, depending on space and number of bulbs. They do well planted close together, but require more water.

DIGGING AND STORAGE

Our early stock is taken up in late September. The bulbs should be taken up within six weeks to two months after blooming but before the tops begin to get brown. Even if the tops are green, bulbs should be taken up before the ground freezes deeply. After digging cut off the tops close to bulb and put in screen bottomed tray to cure. They should have plenty of ventilation while curing and must not be put in containers more than three or four inches deep. Stir them every few days and keep dry. In four weeks they will be cured so that old bulbs may be removed from the bottoms. They may then be placed in storage.

The storage temperature is best at 40 to 50 degrees. Your storage room should be dry, cool and ventilated and as near uniform as possible as to temperature. It is well to look at your bulbs every two or three weeks. If they are showing signs of too much moisture or looking mouldy, dry them out and give better ventilation. Keep them in small containers and spread thin.

THRIP

The adult *Gladiolus* Thrip is a very small black insect about one-sixteenth of an inch long. The injury causes bleaching of the foliage and drying up of the buds so they do not open.

Start spraying when the plants are up 6 or 7 inches high, and spray every week or 10 days. The Government experts recommend 2 level tablespoons of TARTAR EMETIC (purchase at any drug store), 1-3 lb. brown sugar, 3 gals. of water. Keep this concoction well stirred while using as a spray.

If you are thorough in following out a program of spraying you will have no trouble with Thrip.

59 Bliss Road
Longmeadow 6, Springfield, Mass.

..... Varieties you would like to try; mention several from which we may select.
